

# NOTICE OF EVENT POSTPONEMENT

## Public Information Session

Wednesday, March 25, 2020

Alton Legion Hall, Branch 449  
1267 Queen Street West, Alton, ON  
7:00 p.m. to 9:00 p.m

## CBM's Proposed Caledon Quarry Introductory Meeting

Due to the rapidly developing situation in Ontario with coronavirus (COVID-19), and in the interest of public safety, **CBM has decided to postpone the public information session planned for March 25, 2020 in Alton, Ontario.**

This decision has been made based on guidance provided by the World Health Organization and the Public Health Agency of Canada regarding mass gatherings and public events. One of CBM's main priorities includes the health and safety of the community and our staff, so we feel that postponing the event is the responsible decision at this time.

We will be looking to reschedule the public meeting in the future, at a time when it is safe to do so in consideration of future information released by the Public Health Agency of Canada.

We would like to take this opportunity to thank you for your understanding and to re-emphasize that our project remains at the very early stages. There will be numerous opportunities for input over the coming years. We will continue to update the website (see below), as more information becomes available regarding future consultation events, but would also encourage you in the meantime to reach out to us via email or phone to discuss any questions or concerns you may have.

### Project Background

CBM is exploring the feasibility of developing a quarry in the vicinity of Charleston Sideroad and Main Street/Regional Road 136 in the Town of Caledon. CBM initiated technical studies in February 2020 to assist in determining the feasibility of future extraction, and to support the required applications that may be filed for municipal and provincial approvals under the *Planning Act* and the *Aggregate Resources Act*. These technical studies will be completed over the next two years, and the Project is still at the very early stages.
